

File: 6600-20 Haliburton Sewage Force Main Replacement

November 29, 2017

Dear Resident:

Re: Sewage Force Main Replacement along Lochside Drive

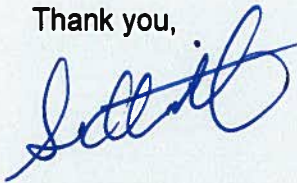

Please be advised of the upcoming construction to replace the sewage force main along Lochside Drive. The approximate extent of the replacement is from the existing pump station, located at the corner of Lochside Drive and Haliburton Road, to 4931 Lochside Drive. The replacement will address issues associated with a section of the system that has known to have failed in the past, causing sewage overflow conditions in the area.

The construction is anticipated to begin near the end of January 2018, and is expected to continue until early spring. Motor vehicle, bicycle, and pedestrian traffic control will be exercised during the construction period. Your cooperation in obeying signage and traffic control personnel is appreciated.

The District's public works department will send out an additional notice of construction to residents in the immediate construction area, 10 days prior to mobilizing to the site.

If you have any questions regarding the project scope feel free to call me by phone at 250-475-5575 or email me at sean.elliott@saanich.ca.

Thank you,
